**GSA SYSTEMS CONNECTS  
AUSTRALIAN SECURITY  
INTEGRATORS WITH THE BEST  
SECURITY PRODUCTS AND  
SOLUTIONS FROM AROUND  
THE WORLD**

OUR AIM IS TO SIMPLIFY YOUR  
JOURNEY FROM NEEDING  
A PRODUCT TO DELIVERING  
AND MAINTAINING INDUSTRY  
LEADING SOLUTIONS

# INDUSTRIES & SECTORS WE SERVICE

GSA supply integrators across Australia who service the needs of clients in:

- Federal, state and local Government
- Hospitals and healthcare
- Mining and energy
- Commercial, retail and hospitality
- Critical infrastructure including prisons, transport and aviation
- Defence
- Communications
- Residential

By understanding the unique needs of each sector and the businesses who service them, GSA are able to offer a range of solutions tailored to their security specifications, including:

- NDAA compliant cameras and security equipment
- Explosion-proof cameras
- AI enabled cameras with:
  - Slip and fall detection
  - Attribute identification
  - License plate recognition
  - Loitering detection
  - Unattended items identification
  - Gunshot detection
  - Virtual line crossing
- Solar security systems for remote and unattended locations
- Sustainable and environmentally conscious products for sites with specified sustainability targets
- Video management systems for easy viewing and management of multiple camera feeds across single and multiple locations
- Access control systems
- Biometric scanners for high security locations
- Facial recognition software including white and black list capabilities
- Intercom systems
- And more

## NEED A CUSTOM SOLUTION? WE'RE INNOVATORS

With a highly experienced team of technical experts on-board, GSA have the capability to custom design systems and tailor performance to meet your requirements. This includes preconfiguring systems and equipment for rapid on-site deployment.

Customisation services we offer include:

- Linking of all devices prior to dispatch
- Testing and configuration of all equipment
- Labelling and provisioning of tailored profiles as per customer specification

To support this, GSA Systems also offers a range of support services and technical guidance.

### GSA PROFESSIONAL SERVICES

Free added value to every system we provide (staging & configuration).

### INTEGRATIONS & SOFTWARE DEVELOPMENT

For unique applications.

### IN-HOUSE TECHNICAL TEAM

We hire experienced and trained technical staff that are locally based and on standby to assist when needed.

# WE'RE

**CREATORS OF SECURITY SOLUTIONS TRUSTED  
BY GOVERNMENTS AROUND THE WORLD.**

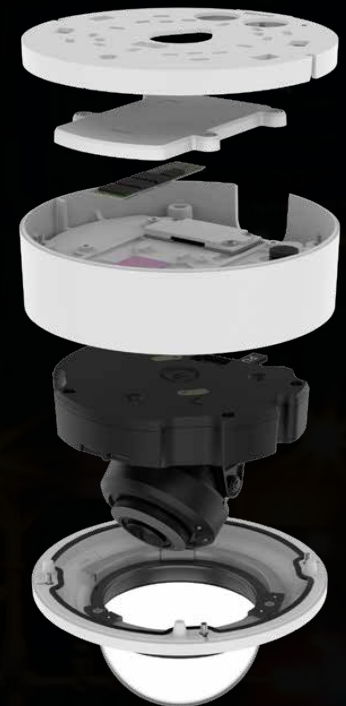

The Hanwha Corporation is a Fortune 500 conglomerate originating in South Korea which has been operating in the Australian market since 2005. Its subsidiaries, who operate across Australia, support a range of industries including security, mining, defence, logistics and sustainable energy.

Hanwha Vision is the security arm of the business. Boasting NDAA certification across the majority of their range, Hanwha Vision security products are trusted by the Australian Government, local councils, hospitals, mines and businesses across Australia.

With industry leading cyber security standards, innovative AI software, video management tools and robust designs, Hanwha Vision's range includes some of the most advanced security technology products available in the Australian market.

As one of the leading authorised distributors of Hanwha Vision products, GSA Systems offer our customers access to security products prized by governments, airports, defence facilities and hospitals across Australia and around the world.

With our specialist, in house technical support team, we're able to design security solutions for integrators and their end users looking to utilise the leading edge systems of Hanwha Vision. This includes pre-staging, pre-commissioning and ongoing support of the complete spectrum of Hanwha Vision products.

# SOLAR SECURITY

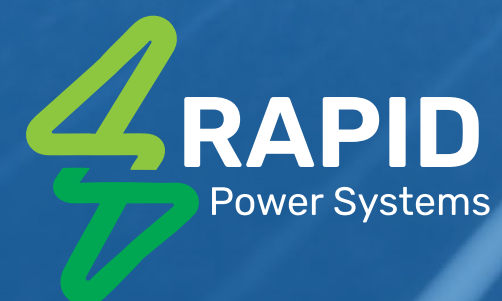

GSA Systems are the exclusive distributor of Rapid Power Systems (RPS) – the premier provider of solar powered security solutions in Australia.

The RPS range includes a variety of solar powered CCTV trailers, as well as temporary and fixed pole-mounted CCTV systems.

Their range of solar security solutions have been designed to cater for a variety of environments and sectors, including but not limited to construction, events, government and defence, warehousing and distribution, utilities and remote and off-grid worksites.

RPS combines innovative designs with reliable technology. This ensures customers receive the best equipment for their projects, each and every time. With pre-made kits and trailers readily available from GSA, RPS's solar security solutions are combined with industry leading CCTV equipment from powerhouse brands including Dahua and Hanwha Vision to deliver a turnkey solar security solution.

# WHY IS GSA DIFFERENT TO OTHER SECURITY DISTRIBUTORS?

## **We. Do. Things. Differently.**

While GSA is a security distributor, how we operate as a business makes us different. As a result, our customers and their end users, reap the benefits.

**By employing our own in-house technical support team, GSA is transformed from 'a box mover' security distributor to a resource provider – offering knowledge, support, technical guidance and services in addition to the products we sell.**

Our team's extensive understanding of traditional and emerging technologies enables us to tailor security solutions for specific requirements. The systems we develop for security integrators make use of leading technology, cutting-edge software, globally recognised brands and most importantly, reliable equipment.

We pride ourselves on understanding the requirements of our client's projects and recommending solutions that are optimised for those conditions. GSA's in-house team frequently test the capabilities, functionality and endurance of systems prior to recommending them, providing our customers the assurance that the solution is not only fit for purpose, but capable of performing in demanding conditions.

Because of our in-depth understanding of the solutions and products we retail, we also offer pre-commissioning services as well as ongoing troubleshooting, upgrades and software updates as part of our general service offering.

**GSA will only supply to registered security businesses, offering genuine products that are backed by complete manufacturer warranties.**

# WHAT YOU GAIN BY WORKING WITH GSA

It's natural to assume that where you purchase your security equipment from should have very little impact on the performance of your security system. After all, shouldn't what comes out of the box be the same no matter where that box was bought?

**We're here to tell you, that's not always the case.**

As part of our full suite of services, GSA provide a range of services that optimise deployment timelines, safeguard quality and improve system outcomes. This not only saves you time on-site, it also reduces downtime for your client's security networks and minimises disruptions to operations on client sites.

On average, integrators who utilise GSA's pre-commissioning services have less issues with equipment faults right out of the box. That's because equipment is inspected as part of our complementary pre-commissioning services for any defects or software requirements. Any issues are typically found before the items are sent to site, meaning firmware can be updated and any damaged or defective equipment can be removed from circulation before it's dispatched; again reducing impacts on installation timelines and improving project quality.

# TECHNICAL SUPPORT & SERVICES

Right across our business, GSA staff have been handpicked because of their technical capabilities and experience.

Our staff's expertise include general and specialist areas of electronic security equipment. GSA also have a number of highly qualified technical officers who perform sales engineering and support roles across the business.

You can be assured that when you contact GSA for assistance, our team will be able to help. With remote support capabilities, GSA's technical support services benefit our integrator clientele by reducing service time on site. When permitted, our team will utilise remote access capabilities to provide system upgrades, troubleshooting, software upgrades, firmware updates and more.

GSA also offer in depth training and support for systems which include alarms, CCTV and video management software, such as Genetec.

**TECHNICAL SUPPORT FOR  
INTEGRATORS IS ONLY A PHONE  
CALL OR EMAIL AWAY WITH  
GSA'S LOCAL SUPPORT TEAM**

## PRE- CONFIGURATION OF CCTV

Includes IP addressing, configuration of servers and workstations, user setups, recording schedules, labelling cameras and packaging.

## PRE- CONFIGURATION OF ROUTERS

Off-site pre-staging includes IP addressing, user and VPN setups, testing of LTE connections, labelling routers and packaging.

## PRE- CONFIGURATION OF INTEGRATIONS

This includes facial recognition, visitor management, intercoms and biometrics. Customers are required to provide network addresses and configuration requirements.

## PRE- CONFIGURATION OF NETWORK

Off-site pre-staging, this includes IP addressing, configuring switches, uplink ports, labelling switches and packaging.

## PRE- CONFIGURATION OF WIRELESS/PTP

Includes IP addressing, configuring wireless radios, testing connections between radios, labelling radios and packaging.

## ON-SITE COMMISSIONING

Configuration of software at your chosen location by a trained GSA technical officer.

# BRANDS WE DISTRIBUTE

# DISTRIBUTION NETWORK & BRANCHES

We're known for our **reliability**.

With a network of branches across Australia, GSA have warehousing and stock holdings across the country. Combining that with fast shipping and competitive pricing and you've got yourself a security distributor who can support your needs all year round, no matter where your clients' jobs may take you!

It's a point of focus for us that we offer the reach of a national business without forgetting the personalised service of a boutique distributor.

GSA's head office and flagship store is located in Tullamarine, Victoria and is supported by a network of branches and warehouses across Australia.

Our custom-built experience centre is also located in Melbourne at GSA's Notting Hill branch. This purpose built specialist facility provides a space for product demonstrations, training and continued professional development courses for our customers.

GSA also have additional branches in Lidcombe, NSW; Northgate, QLD and Balcatta, WA.

Operating across multiple states and locations enables us to service customers locally and safeguards shipping times, in many circumstances greatly reducing them.
