

ES300 / ES3000

The ES300 and ES3000 series of patented Burglar Resistant Strikes are designed for high security applications and manufactured from solid stainless steel, offering a strong dependable and long lasting electric strike solution. A wide variety of face plates in differing widths are available including a Large ANSI plate (supplied as standard) that make the ES300/3000 an ideal electric strike for retrofit and new applications.

ES320
(Harcor)

ES3100
(ANSI Lip)

ES310
(Unmonitored)

-  **Power to Open / Power to Lock**
Changeable on-site
-  **High Security**
Tamper resistant to all known techniques
-  **Extra Security**
3 hardened locking pins
-  **Continuously Rated Solenoid**
Solenoid can be continuously powered
-  **Dual Monitoring**
The ES3000 has both solenoid and latch/door monitoring
-  **One Piece Cast Stainless Steel Body**
Engineered with very few parts the ES300/3000 is extremely robust and can withstand the harshest environments

-  **Slimline Body for easier installation**
Including the 3mm faceplate the total depth is 30.5mm
-  **Optional Mounting Kit**
Reduces installation time
-  **Low Current Consumption**
Max 175mA at 12volts DC - 88mA at 24 volts DC
-  **Installation Template**
Easy to use stick-on template for faster installations
-  **Cycle Tested to 1,00,000 Cycles**
